In response to the Office Action dated December 17, 2002, and made final, please enter and consider the following amendment for the above-identified patent application.

IN THE CLAIMS

1. A phone-interface device, comprising:

a receiver configured to receive a wireless signal from a control panel that receives signals from at least two sensors and that determines whether to send an alarm report to said phone interface device, wherein the wireless signal from the control panel encodes information regarding a sensor event;

a phone port configured to connect to a telephone line and to receive configuration data from the monitoring station; and

a power supply comprising a telephone line.

PLEASE ADD THE FOLLOWING NEW CLAIMS

36. A phone-interface device configured to transmit data to a control panel, the phone-interface device comprising:

a phone port;
